Subject: Access Control Gate
Coves at Charter Oak Subdivision

Dear Council Member Spears:

Thank you very much for your assistance in obtaining approval of the proposed access control gate for the north end of the Coves at Charter Oak subdivision. The existing Weaver Ridge and Vinton Highlands neighborhood associations and the future residents of the Coves will be well-served with reduced traffic and safer intersections because of this action. We appreciate your help.

It is our understanding that we have City permission to install the access gate as proposed on the attached plan. We have initiated the final design and ordering of materials and anticipate construction starting on or around June 20th. To confirm City approval and to provide written documentation for the file, we are respectfully requesting your written approval of the attached plan. If you would please sign below and return to my attention, I would appreciate it very much.

If there are any further City concerns that we must address prior to the start of construction, please let us know by June 18th, if possible. We have copied Mr. Hewitt and Chief Tomblin to seek any further comments they might have as well.

Again, thank you very much for your time and assistance in this matter.

Sincerely,

Mike Stauffer
EXCELL Homes L.L.C.
